Oil Blue B Liquid

Description

Dark blue liquid. Liquid dye designed for use with in-line fuel blending operations.

Composition

Solution of Anthraquinone dye in xylene.

Applications

Liquid dye specially formulated for ease of in-line injection into fuels such as gasoline, including aviation gasoline, gas oil and diesel fuel. Soluble in all hydrocarbons; solvents, fuels, lubricants and greases at normal treat rates.

Typical Properties

Kinematic Viscosity 20°C	15 cSt
Density 15°C	0.96 kg/l
Closed Flash Point (PMCC)	30°C
Crystallization temperature	-18°C
Pour Point	below -39°C

Treat Rate

Treat rates for Aviation gasoline (AVGAS) are given under Approvals. In other fuels, Oil Blue B Liquid may be used over a range of treat rates depending on customer or specification requirements and on the inherent colour of the base fuel. Typically, the lowest treat rate to produce visible blue colour in fuels is around 2 mg/l.

Oil Blue B Liquid may be added 'as supplied' or as a pre-diluted solution.

Approvals

Oil Blue B Liquid is approved for use in aviation gasoline under the following major specifications:

ASTM D910 DEF STAN 91-90

In ASTM D910 the maximum concentrations of Oil Blue B Liquid that may be added to the various grades of aviation gasoline are:

80 Grade (Red)	0.34 mg/l
100 Grade (Green)	4.6 mg/l
100LL Grade (Blue)	4.6 mg/l

In DEF STAN 91-90 the maximum concentrations of Oil Blue B Liquid that may be added to the various grades of aviation gasoline are:

80 Grade (Red)	0.34 mg/l
100 Grade (Green)	3.7 mg/l
100LL Grade (Blue)	4.6 mg/l

Approved by Pratt & Whitney under PMC 4513 for use in oil system leak checks on P&W engines.

Safety and First Aid

Always consult the Innospec Safety Data Sheet for safety information before using the product.
